

CENTER FLOOR CONSOLE

ABSTRACT OF THE DISCLOSURE

A storage console, comprising mix and match storage modules adapted to be arranged in a variety of positions on a supporting framework. The modules include end or terminal bins, lateral bins, medial bins, wall panels, and cargo nets among others. The framework of the console includes a base tray supporting a plurality of upright members, each having grooves of predetermined cross-section enabling a user to fix the desired modules. Each module is adapted to provide flexibility and cooperate with different storage compartments. Wall panels may be attached to the framework to facilitate secure and private storage. In addition, provision can also be made for connecting different powered accessories such as lighting, audio, video, and the like. In addition the base of the center floor console along with said accessories may with the twist of a latch, be removed from the vehicle entirely.
